DP2701X for product name:

XXXXXXXXXX The first 3 letters are the model, and the last 4 letters are the year. The first and second letters represent the first year, the third and fourth letters represent the second year, the fifth and sixth letters represent the third year, and the seventh and eighth letters represent the fourth year. The last four letters represent the batch code.

Typical Output Power Table (1)

Model	Output Power (W)	Output Voltage (V)
DP2701A	5	5
DP2701B	5	5
DP2701C	5	5
DP2701D	10	5.5
DP2701E	12	10
DP2701F	15W	12V

except for the max. output power. Note 1: The max. output power is based on the max. output current.

Note 2: 10W/12V or 10W/15VAG with voltage doubler.

Note 3: Output continuous power to a non-ventilated enclosed capacitor with sufficient drain pattern as a heat sink at 25°C.
